

COP2500C - Homework # 3
Due: Oct 6 11:59pm
Early Submission: Sep 29 11:59pm

Topic:

- Building an HTML Form

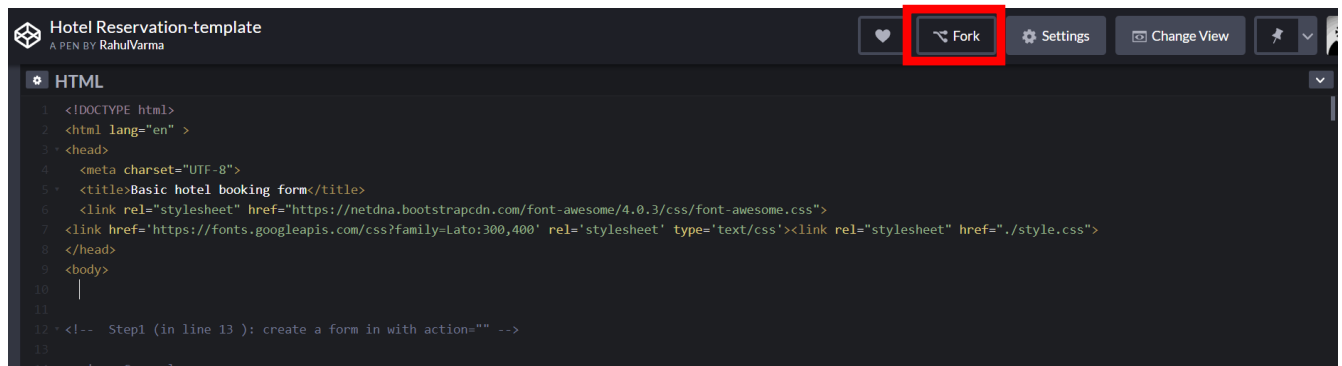

Instruction:

1. Create an Account in Codepen.io:

1. To create an account in Codepen.io, please watch the following video:
 - <https://www.youtube.com/watch?v=fIQAnqDWCy8>

2. Open the template in Codepen.io:

1. Click on the link <https://codepen.io/URV/pen/bGbzgeW>, followed by that you will be prompted with the **Hotel Reservation-template** shown below. (picture 1)

Picture 1

2. Fork it.

3. Read the instructions in the template and complete the HTML file:

1. There are **19 missing lines** in HTML file that each of them represents a **missing element** in the webpage. The description of the missing elements are available as comments (denoted by **<!-- step -->**) before the missing elements in the html file. Please don't forget to see the expected output (Picture 2), before adding the missing elements to the HTML code. It will help you to have a clear picture about the output.
2. Visualize the changes after implementing each step.
3. Both CSS and JS are already prepared, please do not modify them.

- Once you completed all the instructions mentioned in the template, you should be able to view the webpage as below.

BOOKING & CONTACT

Name	
Email	
Phone	
Street	Number
City	Post Code
Country	

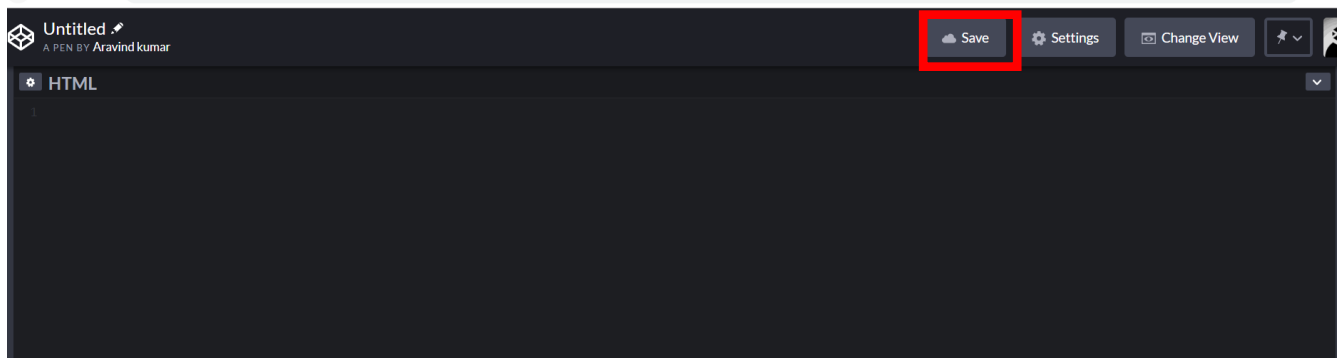

DETAILS

Arrive	Depart	
People	Room	Bedding
Please describe your needs e.g. Extra beds, children's cots		
Comments
